SPEX UPC

The Power Behind Inventory Management

SPEX UPC

● Eliminate manual data entry

Improve efficiency and eliminate data entry errors. SPEX UPC contains all the frame information you need, including pricing and UPC codes.

● Ongoing inventory management

When a frame is sold or dispensed to a patient, the inventory level is automatically adjusted.

● Control retail price

Most PM software allows a retail price to be automatically generated using pre-set markups. SPEX UPC enables this to happen automatically and without error.

SPEX UPC

Information on over 35,000 frames is available when SPEX UPC CD-Rom data is loaded into your Practice Management Software. Whether you are a large or small practice, managing your frame inventory is critical to a healthy bottom line. SPEX UPC saves time and money by eliminating manual data entry. It enables inventory management control by providing product information, as well as updated pricing through 12 monthly issues.

SPEX UPC is compatible with the following practice management software packages:
